Purchase Link: To purchase a license key for AudiFab Apple Music Converter for Windows, click [here](#).

1. Why should I buy AudiFab Apple Music Converter for Windows?

AudiFab Apple Music Converter for Windows is the shareware, the trial version has the limitation that you can only convert first **minute** of each audio. After you purchase the product, you will receive the registration info which will unlock the full version.

2. What benefits do we have after registration?

- Convert Apple Music without time limitation.
- Unlimited conversion with high quality.
- FREE technical support & upgrade.

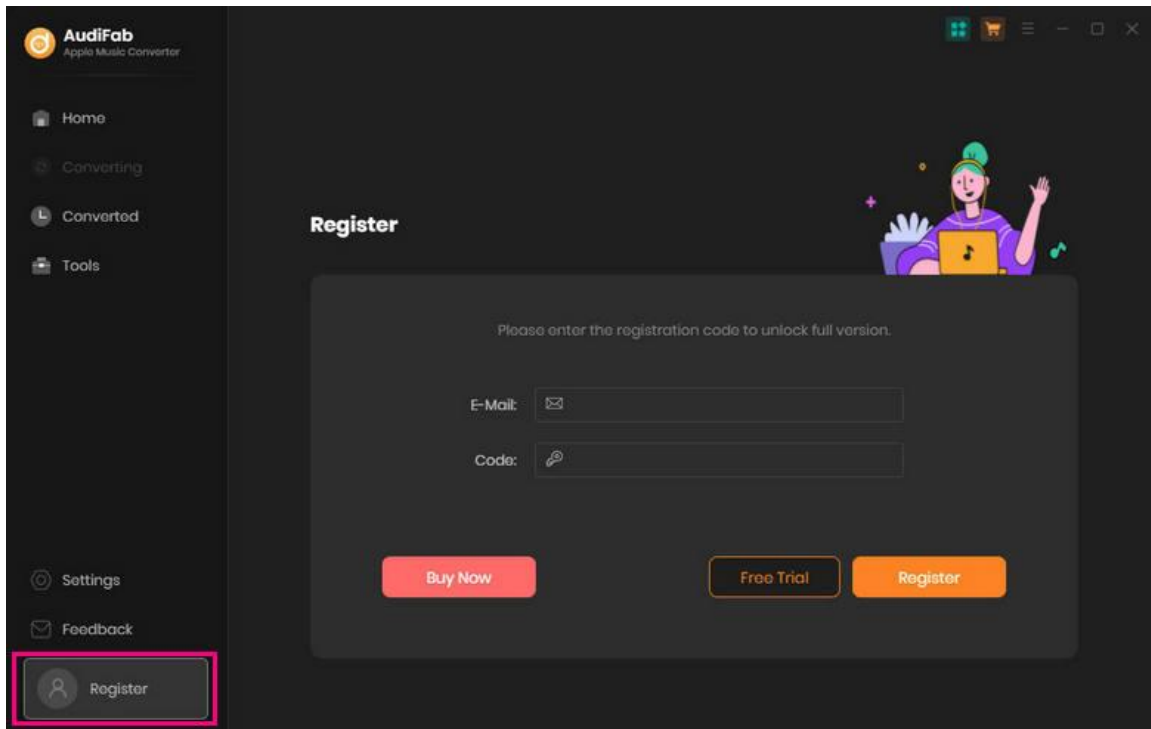

AudiFab Apple Music Converter for Windows

Register AudiFab Apple Music Converter for Windows

Step 1: Launch AudiFab Apple Music Converter on PC. First you should click the **Register** button on the bottom left corner.

Step 2: Please fill the input blanks with your registration Email and registration key. You may use **Ctrl+C** to copy and **Ctrl+V** to paste in the window. Then please click **Register** button.

The registration code is case sensitive, please do not add blank at the beginning or the end of the word. You can also copy and paste the registration information into the registration popup dialog.

Step 3: After finishing the registration, the limitation of the trial version will be removed.

Note:

1. Make sure both the Email and registration key are provided by our company after you paid the license. If you have not paid, please click **Buy Now**.
2. Please make sure the Email and registration key you entered are both completely and correctly, if not, an error message will pop up.

AudiFab Apple Music Converter for Windows

Choose Record Music by App or Web

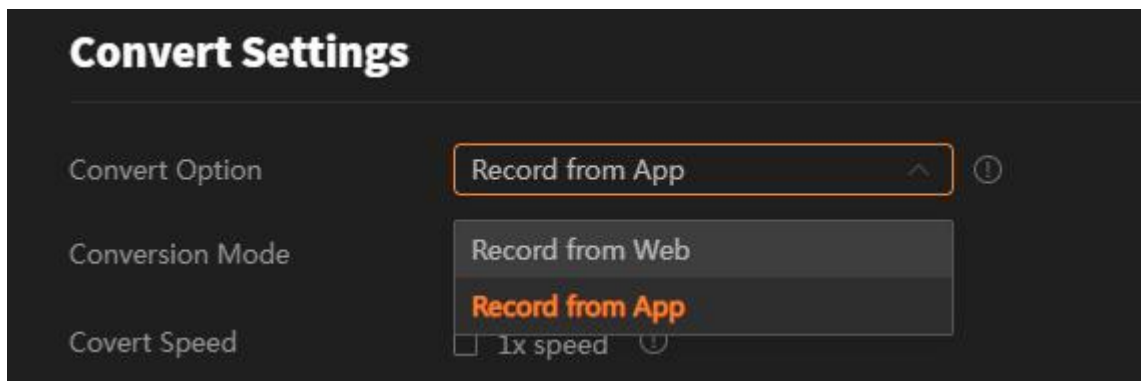

Tap the  button at the bottom-left corner of AudiFab, and choose your preferred **Convert Option** (App/Webplayer mode)

- iTunes App Mode (Recommend for Win Users):

Convert songs at 10x speed & keep the best audio quality.

- Apple Music Webplayer Mode (Recommend for Mac Users):

Download songs at 10x speed without installed iTunes/Music App.

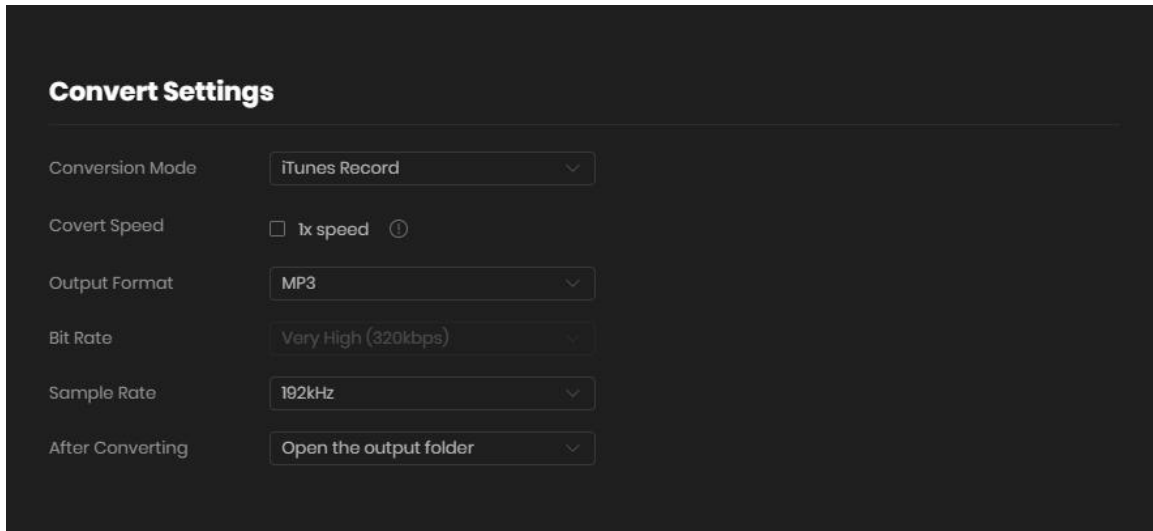

AudiFab Apple Music Converter for Windows

Choose Output Format

Click the  button at the bottom left corner to set the **Output Format** (MP3, WAV, FLAC, AAC, ALAC or AIFF), **Conversion Mode** (Intelligent Mode, iTunes Record, YouTube Download), etc. for your needs.

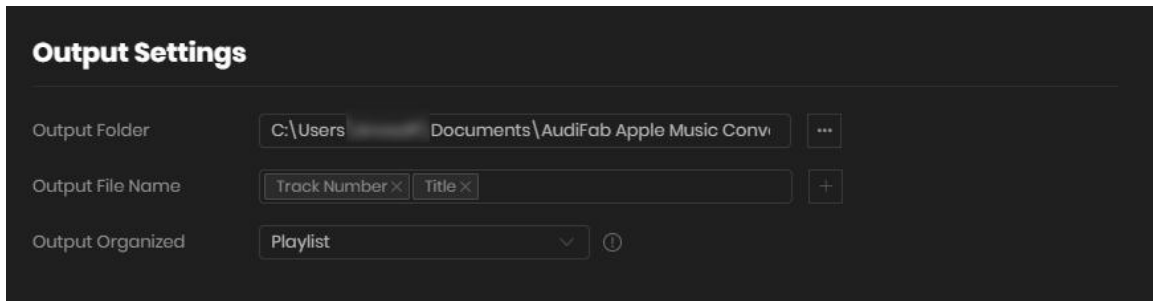

Convert Settings

Conversion Mode	iTunes Record
Convert Speed	<input type="checkbox"/> 1x speed ⓘ
Output Format	MP3
Bit Rate	Very High (320kbps)
Sample Rate	192kHz
After Converting	Open the output folder

Customize Output Path

Click the  button on the bottom left, then you can customize the output directory in the pop-up window.

Output Settings

Output Folder	C:\Users\... Documents\AudiFab Apple Music Convi	...
Output File Name	Track Number × Title ×	+
Output Organized	Playlist	ⓘ

Tips:

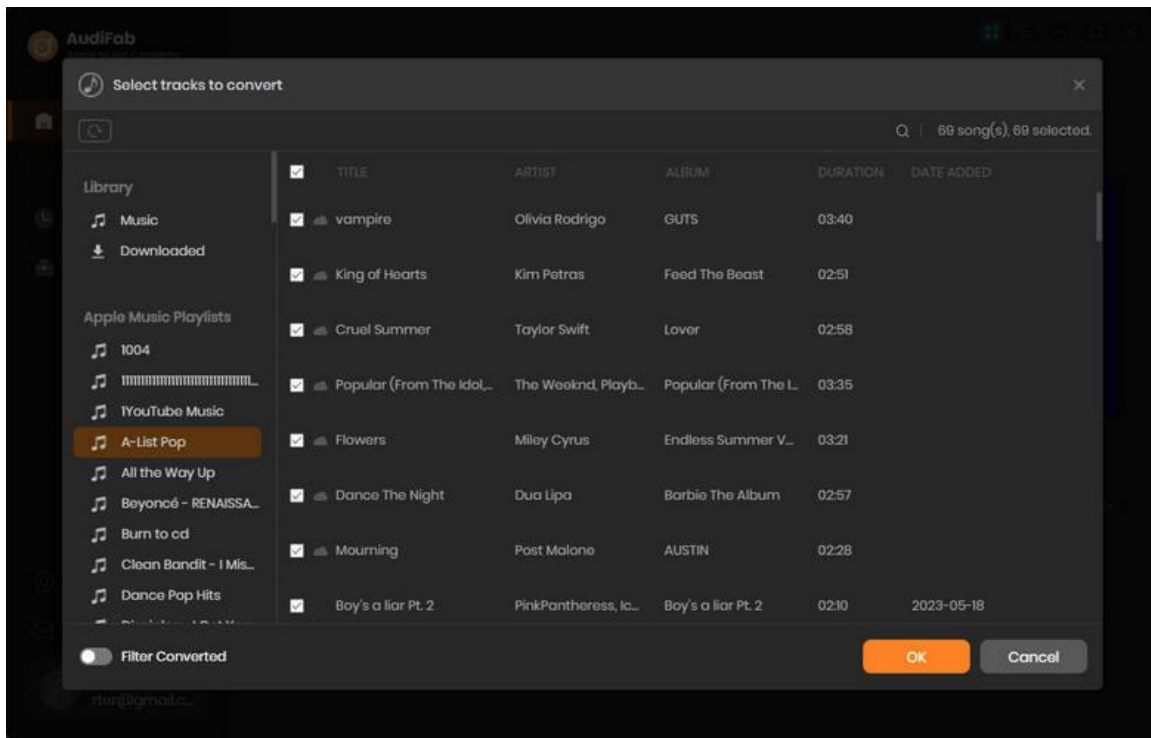

1. If you don't change the output path, the converted files will be saved in AudiFab default folder:
C:\Users\User Name\Documents\ AudiFab Apple Music Converter
2. You can click the "..." button to show the output path and change it.

AudiFab Apple Music Converter for Windows

When the conversion is done, you can click the **Converted** button on the left side to show up the records.

You can also check the converted files by directly going to the output folder you set.

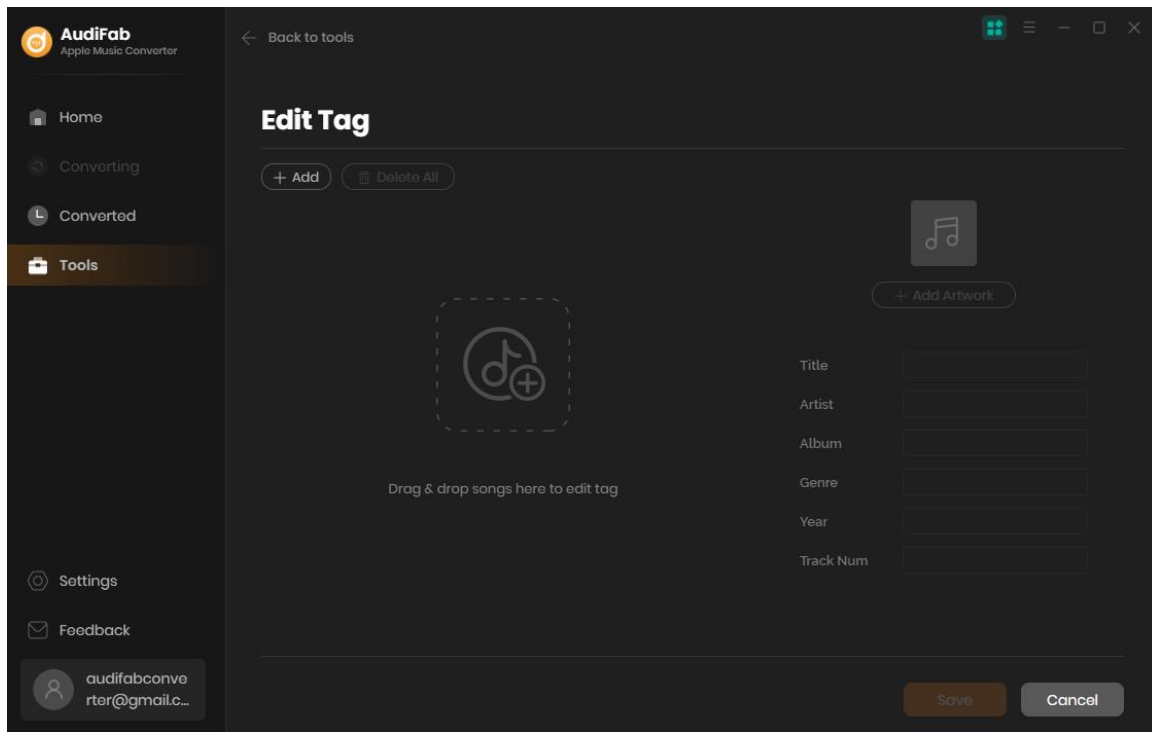

AudiFab Apple Music Converter for Windows

Edit ID3 Tags

AudiFab Apple Music Converter retains the original quality of Apple Music and keeps ID3 tags after conversion. You can also edit all the Metadata information by clicking "**Tools**" > "**Edit Tag**".

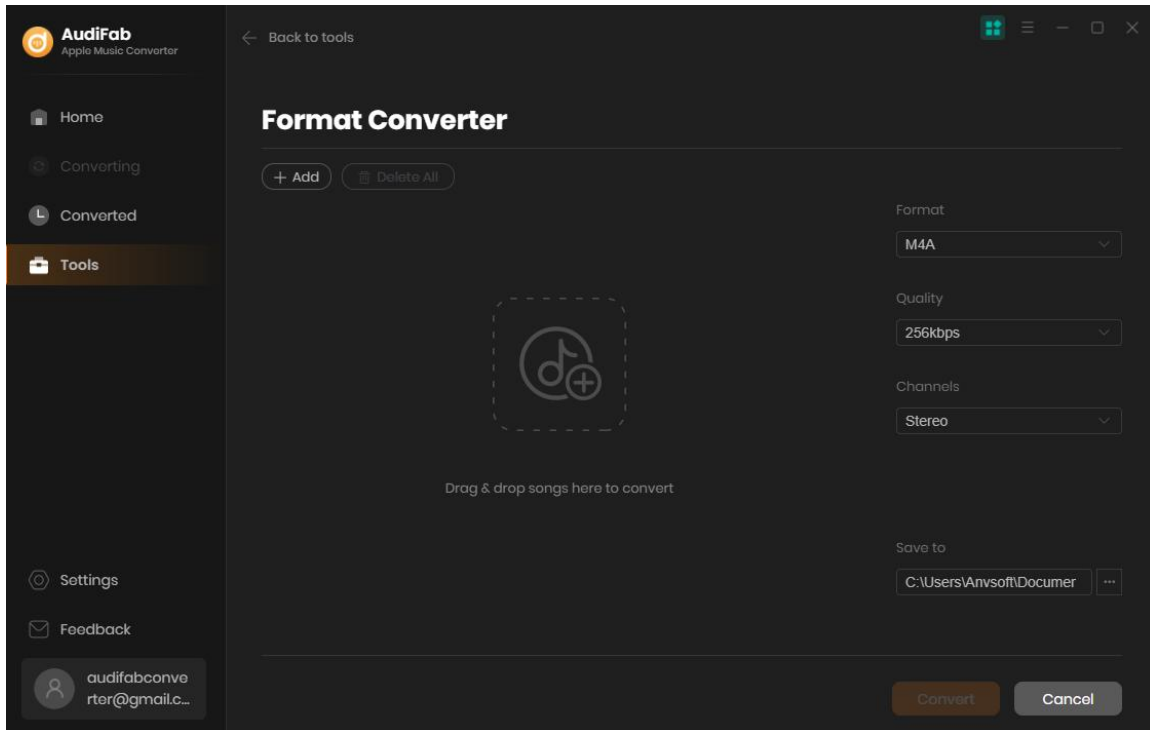

AudiFab Apple Music Converter for Windows

Convert Normal Audio

Apart from converting Apple Music, AudiFab Apple Music Converter also supports to **convert the common music to MP3/M4A/AAC/WAV/OGG/AIFF format**. Just open AudiFab, click "**Tools**" > "**Format Converter**", and then add the music from your computer to convert.

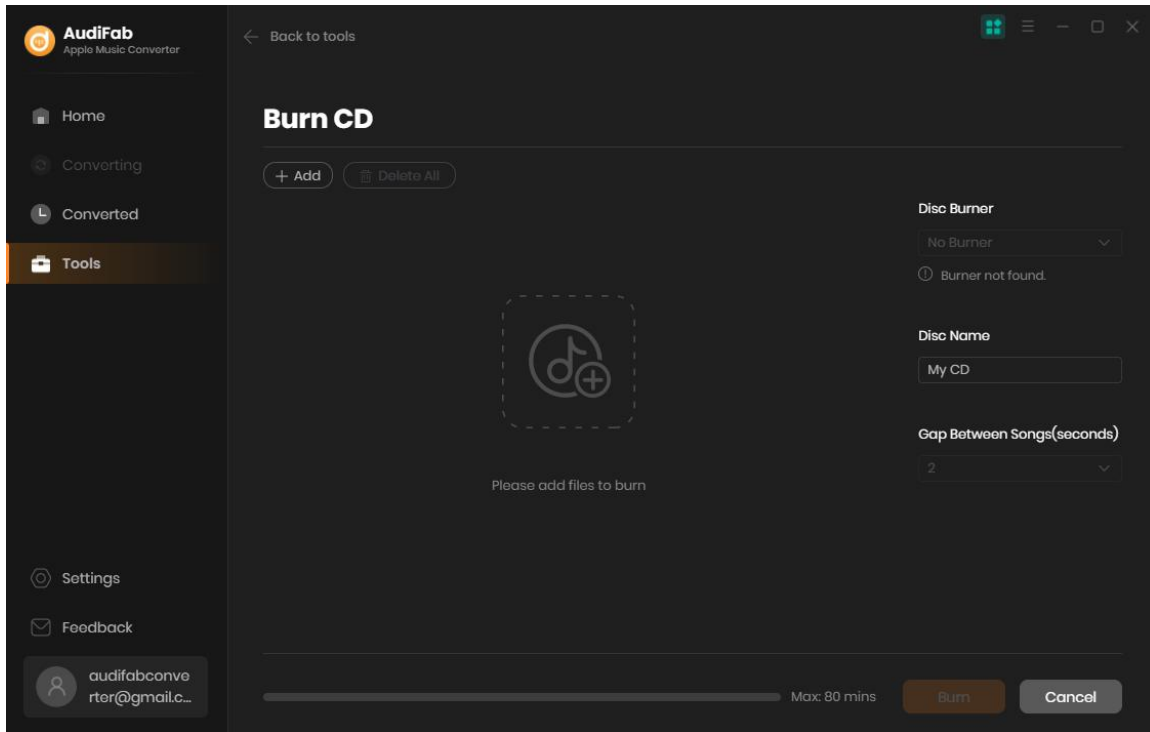

AudiFab Apple Music Converter for Windows

Burn Apple Music to CD

AudiFab Apple Music Converter also allows you to burn converted Apple Music songs or local audio files to CD directly. You can easily go to "**Tools > Burn CD**", then there will be a pop-up window prompting you to add music from your computer. Then all your songs will be burned into a CD after a few minutes.

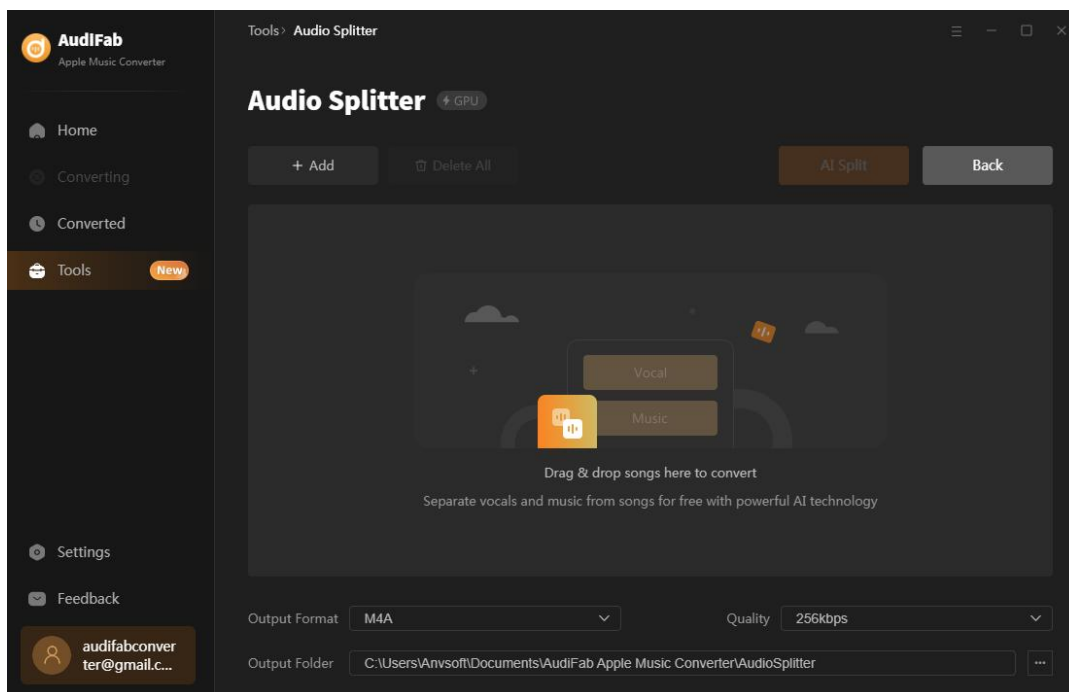

AudiFab Apple Music Converter for Windows

Split Audio into Vocals and Accompaniment

AI Audio Splitter is a powerful and easy-to-use tool that can separate audio into different stems, such as vocals, accompaniment, and instruments, using AI models. You can choose from various separation schemes/models according to your quality and speed requirements. You can also adjust the volume and other parameters of the separated stems.

AI Audio Splitter can be used for various scenarios, such as:

- Separating vocals for audio editing and processing
- Separating accompaniment for karaoke, making backing tracks, or merging your own recordings
- Separating different instrument sounds for remixing, sampling, or learning

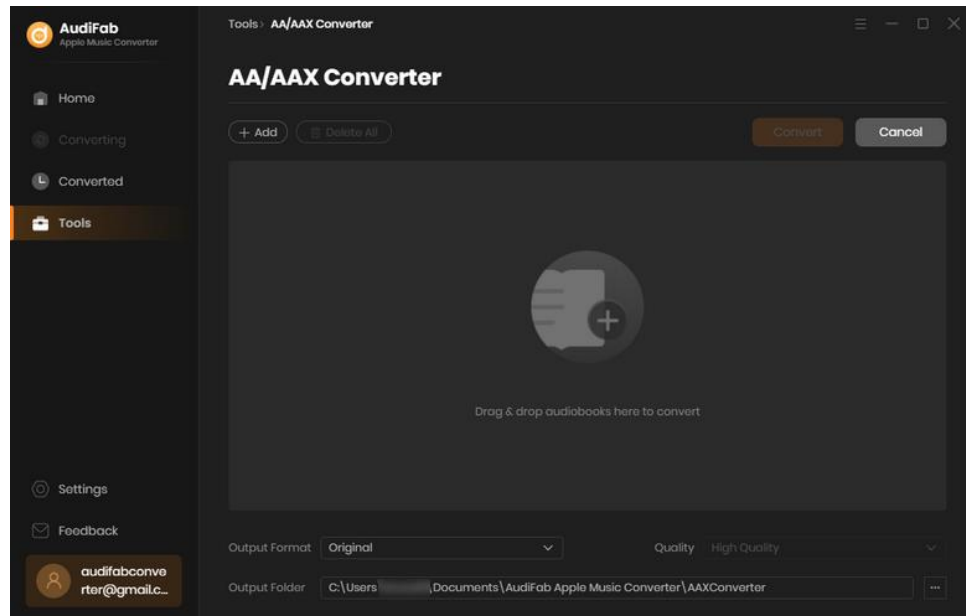

AudiFab Apple Music Converter for Windows

Convert AA/AAX Audiobooks

There is a paid tool call A/AAX Converter, which can help you convert local aa or aax audiobooks to M4A, M4B or MP3 format easily. Navigate to **"Tools" > "AA/AAX Audiobooks"**.
