PURCHASE & REGISTRATION

• Purchase Windows Version of AudiFab Music One

• Register Windows Version of AudiFab Music One

Purchase Windows Version of AudiFab Music One

Quick Link: To buy a license key for the Windows version of AudiFab Music One, click Here.

1. Why should I buy Windows version of AudiFab Music One?

AudiFab Music One Windows version is a shareware, and the trial version limits users to convert the **first minute** for each audio for sample testing. After purchasing the program, you will be offered a license with your registration e-mail and key code which will unlock the trial version limitation.

2. What benefits do I have after registration?

- You can **convert any streaming songs without time limitation**.

- You can enjoy lifetime FREE upgrades to the latest versions of the same product.

- You can enjoy FREE technical supports.
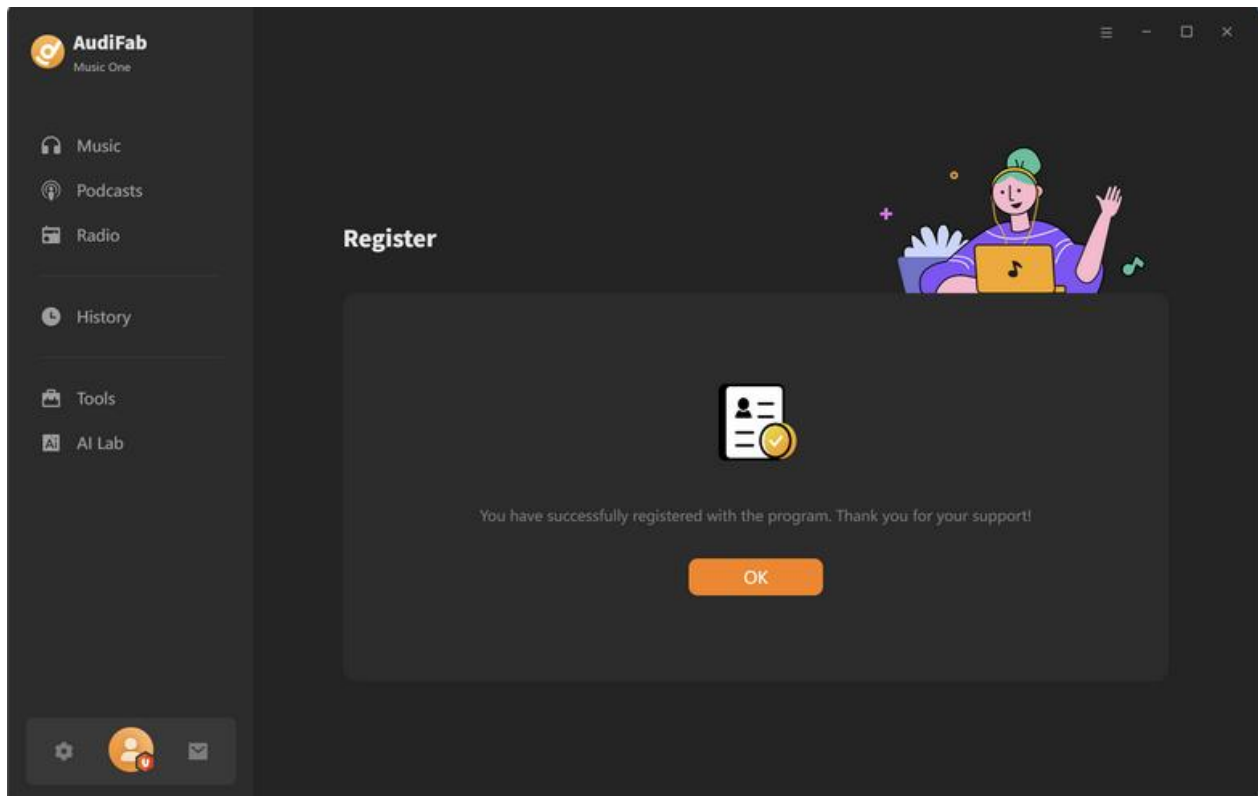

Register AudiFab Music One for Windows

Step 1: Run AudiFab Music One on PC, and click the " ☰ " icon > **Register** to open the registration dialog and fill in with your registration info.
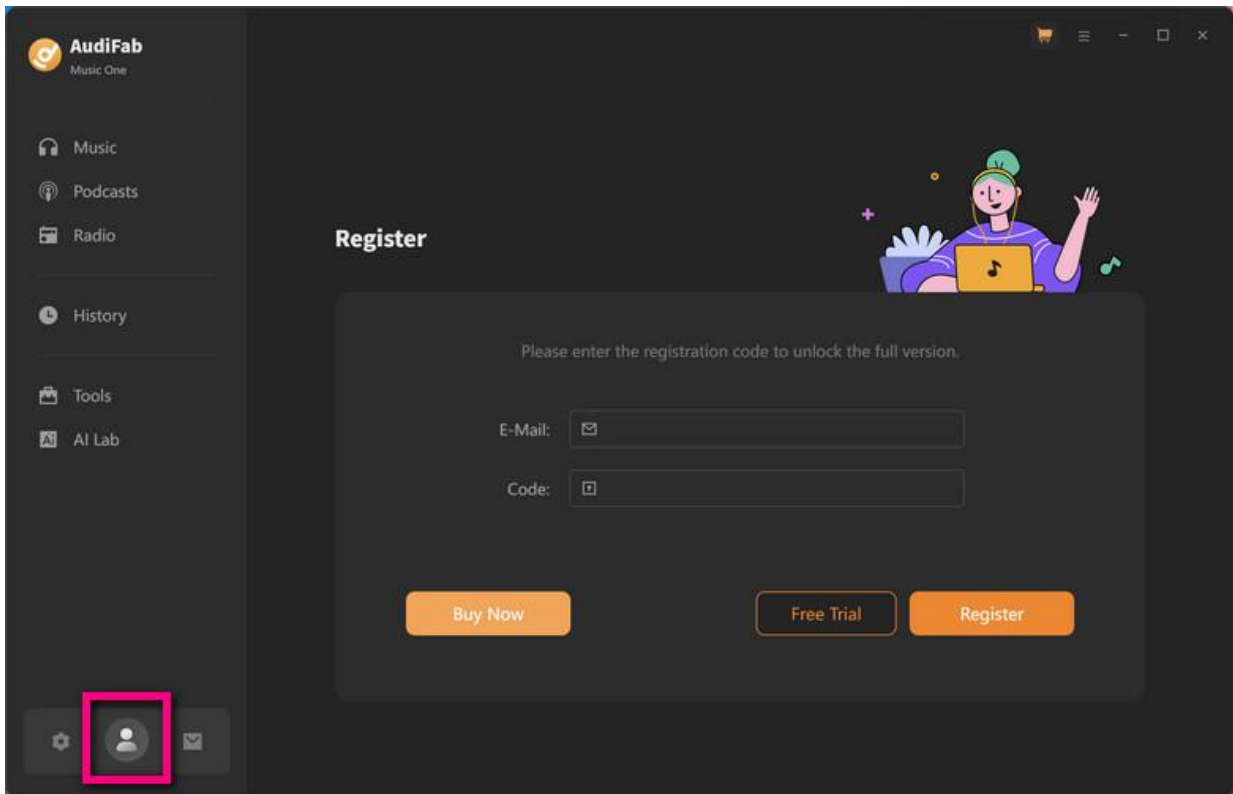

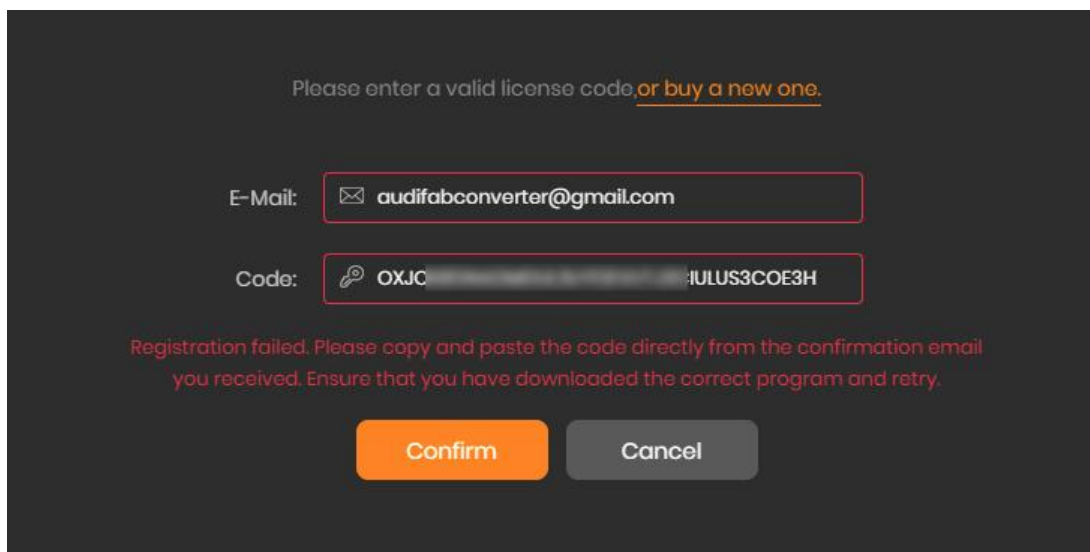

Step 2: After you finish the registration, the limitation of the trial version will be removed.

Note:

Make sure both the Email address and key code are the same as what we provided in the confirmation email after purchasing the program. if not, an error message will pop up as below:

INSTALLATION & INTERFACE

- Installation

Help

AudiFab's 'Online Help' section includes almost all common questions and you can find answers for common issues. This could help you to save time to fix the problem.
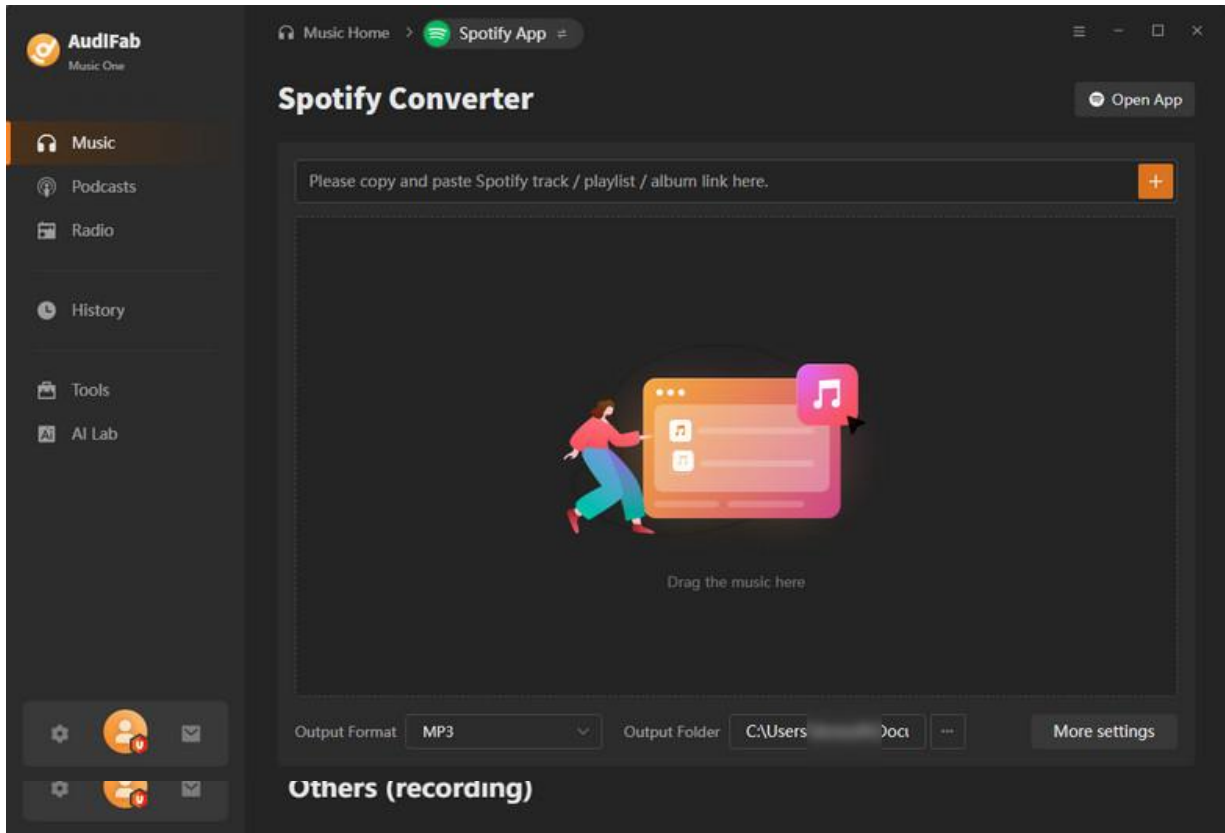

# TUTORIALS

Select Music Platform

Launch the AudiFab Music One program, then choose your preferred music streaming service. For example, let's start by selecting **"Spotify .**
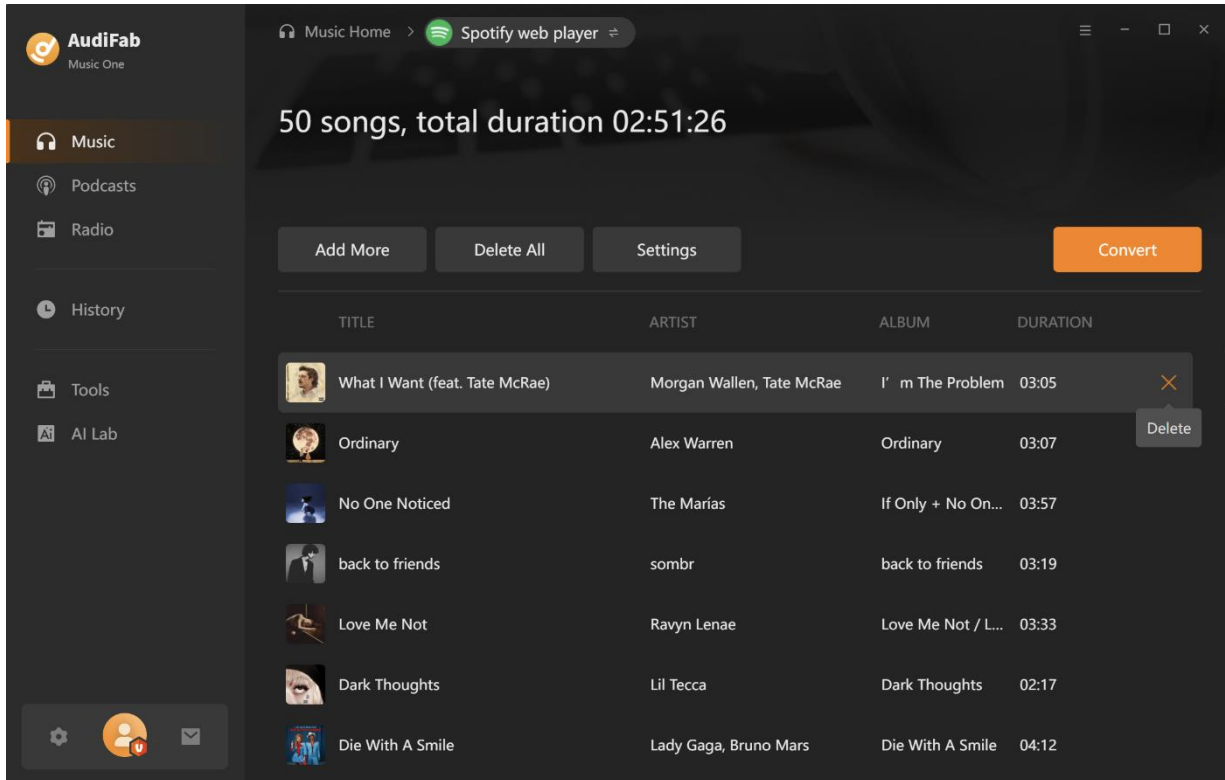

Import Music

Drag & drop songs, an album, an audiobook, a podcast or a playlist from the Spotify app to AudiFab. AudiFab would read the URL automatically and list out the songs. Check the titles that you'd like to export to your local drive and then click **Add**.
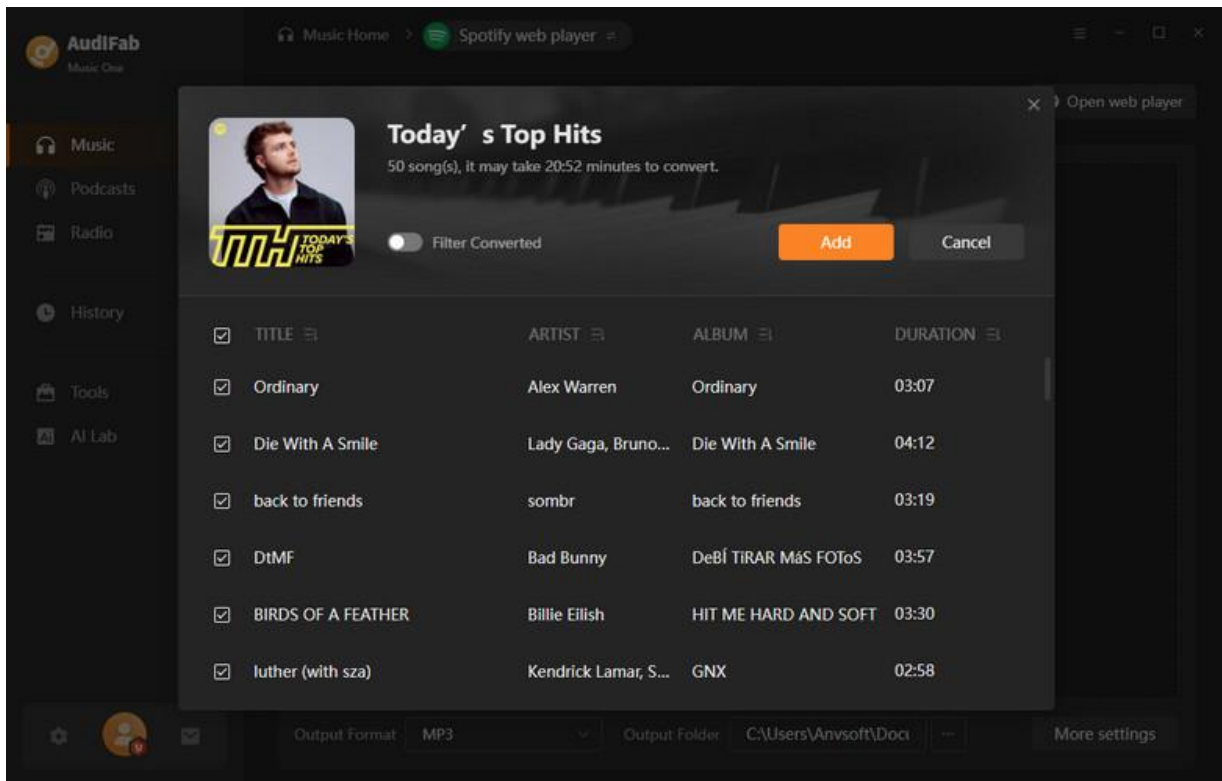

Delete Music

After clicking Add, all tracks that you need to convert will be listed below. If you still want to **delete some files** now, just move your mouse on the file and there is a small ✕ to delete the file. If you think you don't want all of them, there is a [🗑 Delete All] button.

Adjust Output Settings

Click the ⚙️ Settings button on the lower left, allowing you to choose the **output format** (MP3/AAC/WAV/FLAC/AIFF/ALAC), specify the **output folder**, customize how you'd like to name and sort out the converted files, etc. On the lower section of setting window, you can specify output folders organized by Artist, Album, Artist/ Album, Album/ Artist or None.

❖ Conversion mode: Record Mode, Intelligent Mode, YouTube Download

❖ Output Format: MP3, AAC, FLAC, WAV, AIFF, ALAC

❖ Output Quality: 128kbps, 192kbps, 256kbps, 320kpbs

❖ Sample Rate: 44.1kHz, 48kHz, 96kHz, 192kHz

❖ Output File Name: Track Number, Title, Artist, Album, Playlist Index, Year

❖ Output Folder: Create a folder on computer to save the songs.

❖ Output Organized: None, Playlsit, Artist, Album, Artist/Album, Album/Artist, Playlsit/Album, Playlsit/Artist.
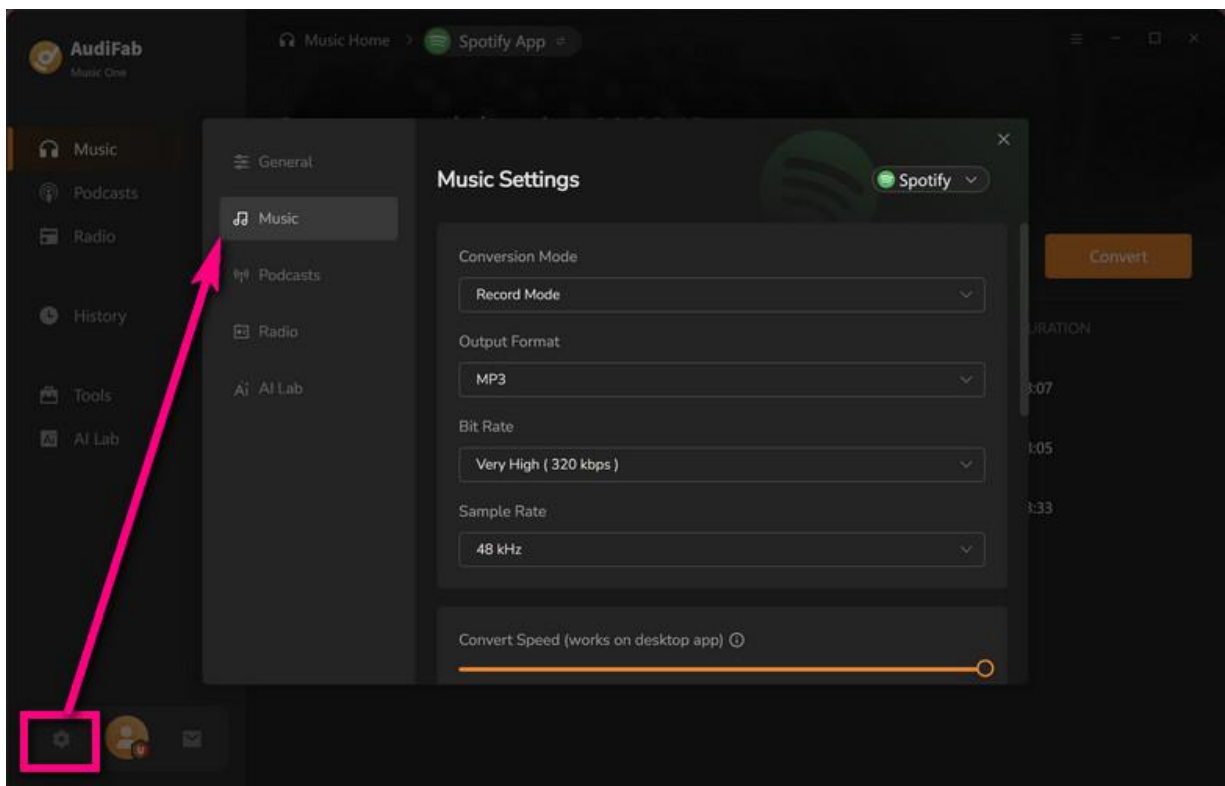

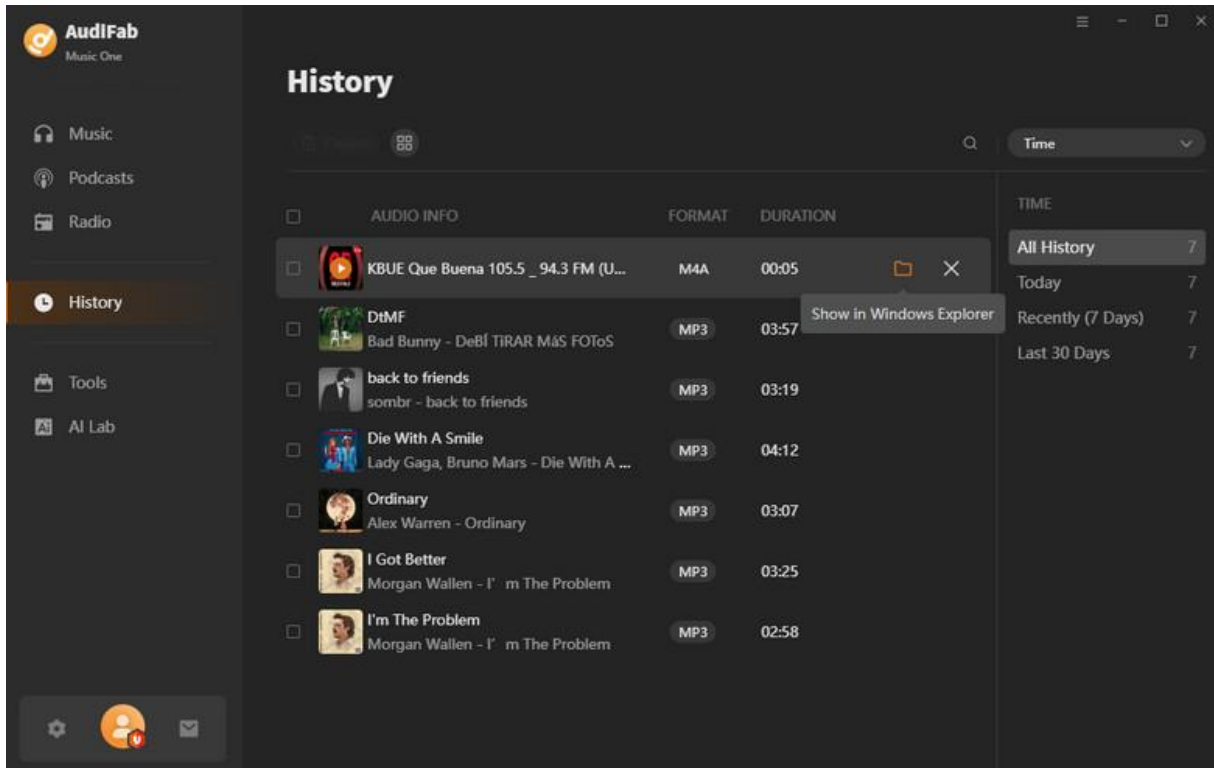

Convert Music

Click the **Convert** button on Home and AudiFab would immediately start exporting the

Spotify songs to your computer.

Check Converted Music

Once the conversion is completed, click the **Converted** tab and you can check all the songs that have been converted successfully. Where can I find the downloads? Just go to the output folder.

Format Converter
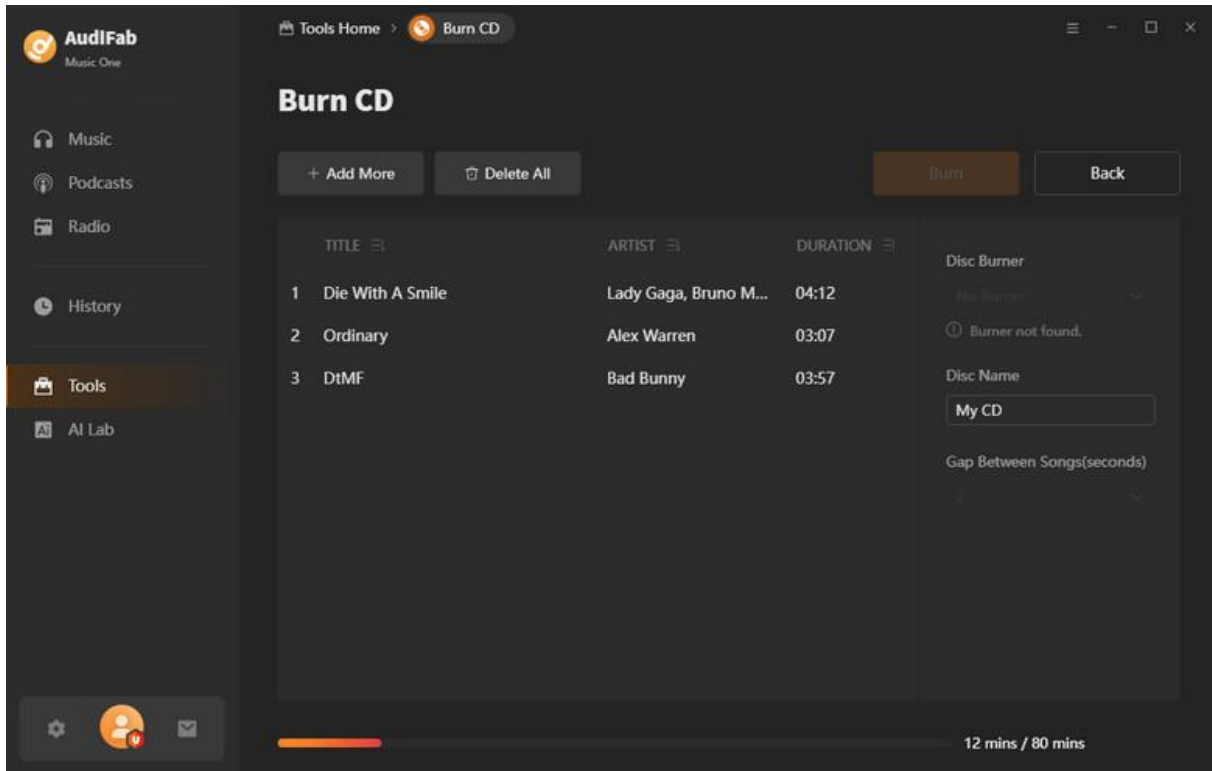

This tool allows you to convert your **local music files to MP3/M4A/FLAC/WAV/OGG/AIFF** format.

Burn Music to CD

This tool allows you to burn converted and existing music files to a CD with a maximum of 80 minutes.
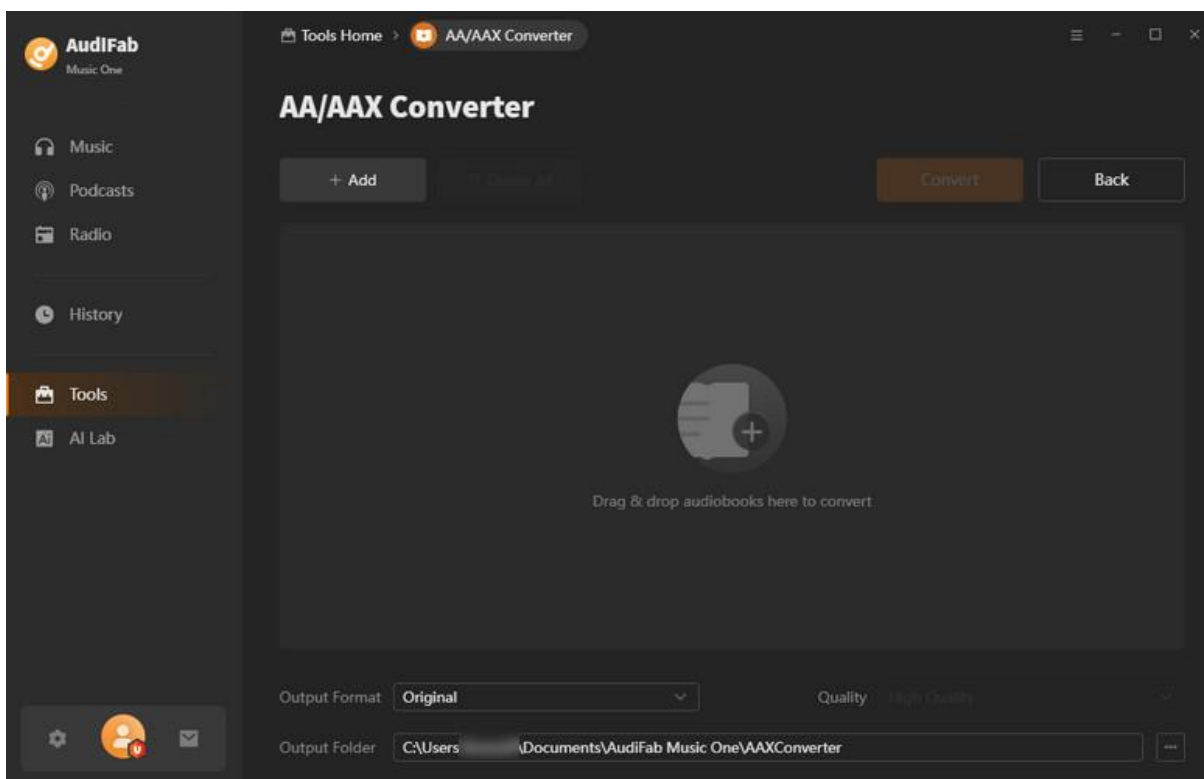

Edit Tag

This tool allows you to **edit ID3 tag** of a song. You can change the information of 'Title', 'Artist', 'Album', 'Genre', 'Year' and 'Track Number'.
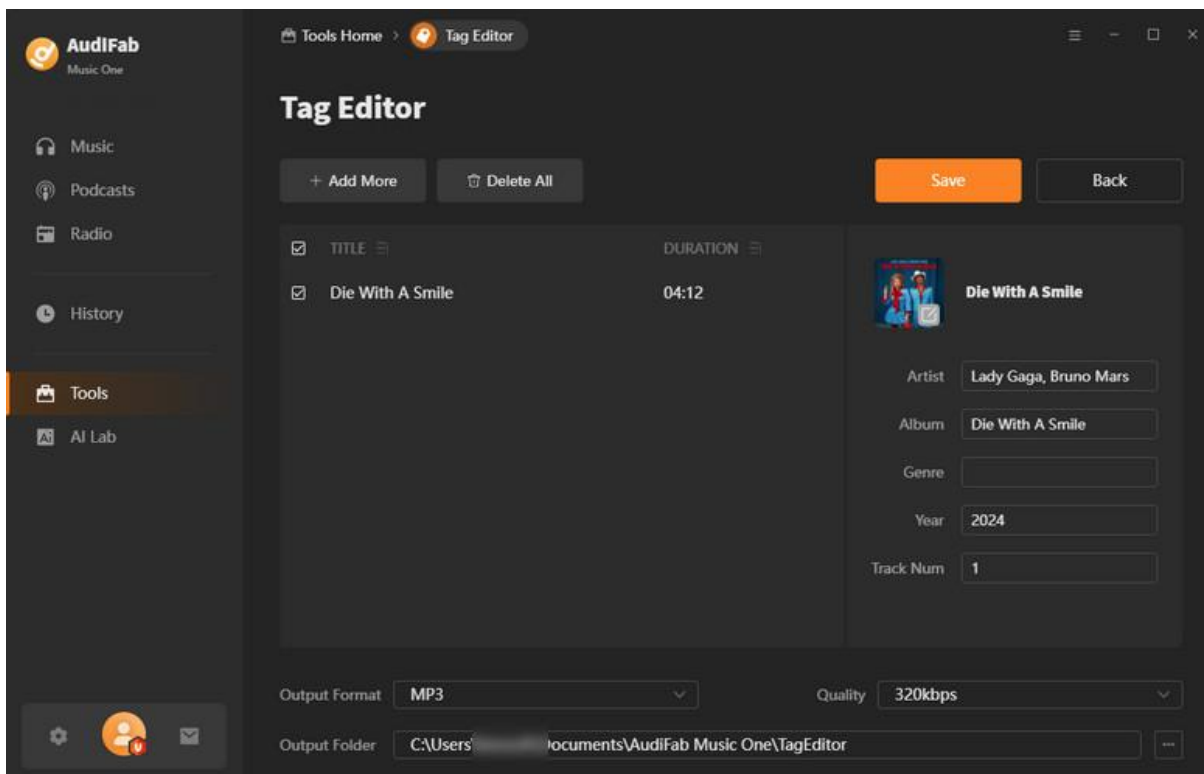

AA/AAX Converter

There is a paid tool call A/AAX Converter, which can help you **convert local aa or aax audiobooks to M4A, M4B or MP3** format easily. Navigate to "Tools" > "AA/AAX Audiobooks".

Free Podcast Downloader

AudiFab offers access to hundreds of podcasts across various genres, all available for free download. Simply open the AudiFab Music One program, navigate to the "Podcasts" tab, browse and select your favorite shows, and click "Download" to save episodes as MP3 files for offline listening.
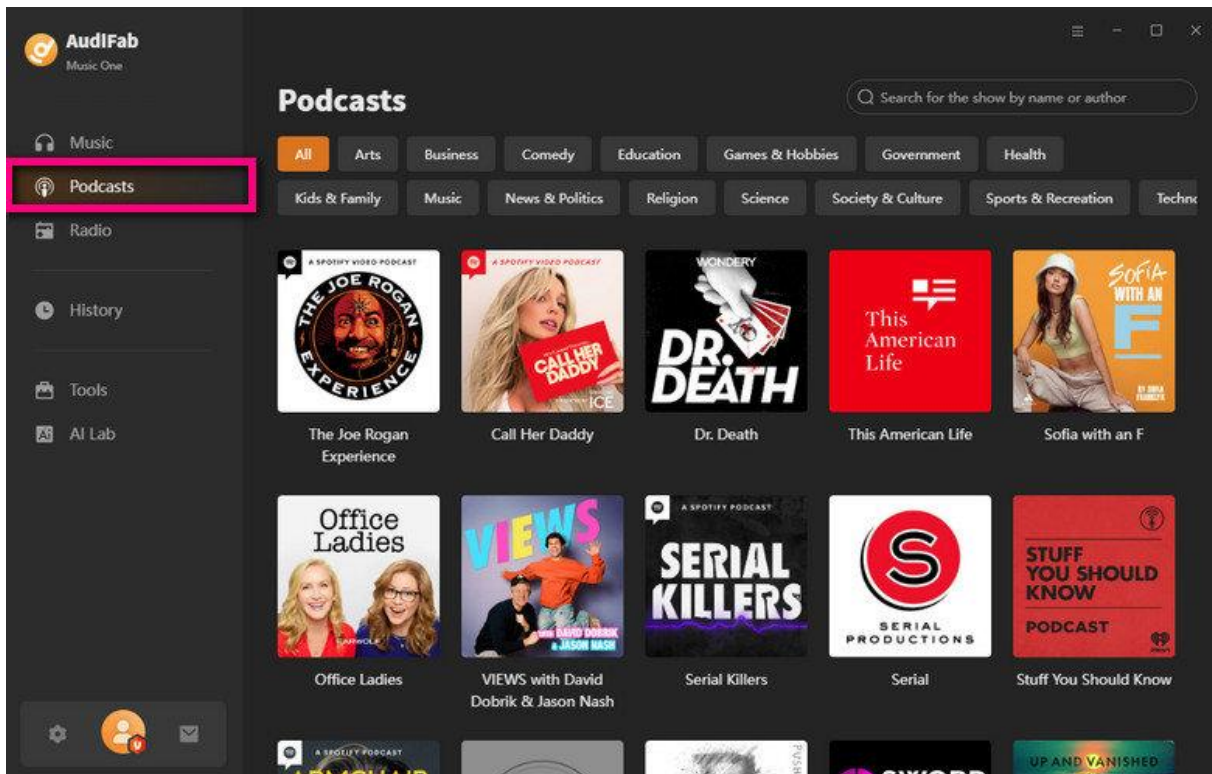

Online Radio Recorder

To download radio shows with AudiFab, go to the "Radio" tab, select a show, and set your preferred output format, audio quality, and destination folder. Then, play the show and click "Click to Record" to start recording.
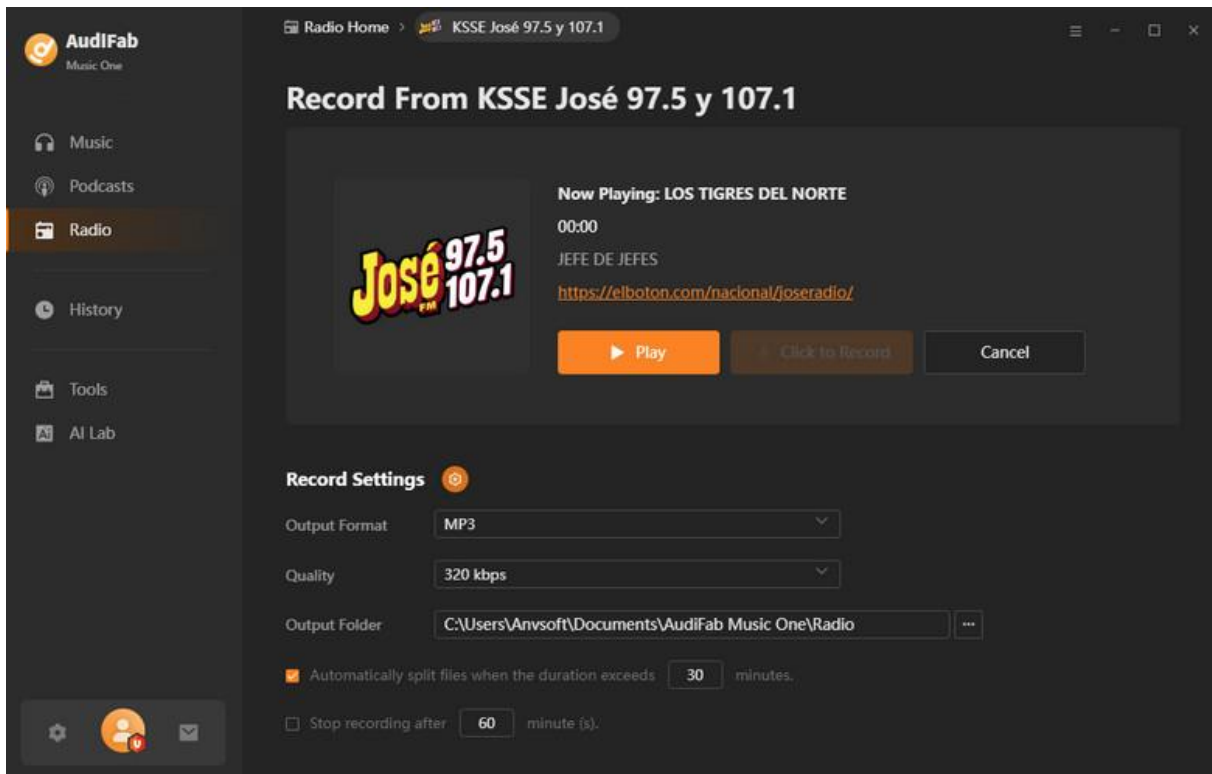

AI Audio Spitter

AudiFab's AI Audio Splitter allows you to isolate vocals and instruments from any track with ease. Simply click "AI Lab" on the left panel, hit "+Add" to import your audio files, choose MP3, M4A, FLAC, WAV, OGG, or AIFF as the output format, and set your desired save path.
